SUMMARY

Frontend Engineer with 3+ years of experience building and maintaining production-grade web applications in travel and aviation domains. Currently owning the Flights module for a large enterprise travel platform, working across multiple teams and mentoring interns. Strong expertise in Vue 3, state management, API-driven UI development, and working within complex enterprise and legacy environments (CMS, CDN-based integrations). Actively leveraging Generative AI tools to improve development velocity and code quality. Passionate about building scalable, user-focused digital systems.

EXPERIENCE

Software Developer (T3) – Thomas Cook (Client), 10/2025 - Current
Payroll: Risosu Consulting LLP - Mumbai

- Own frontend development for the Flights domain, supporting critical business flows such as multicity search, date handling, validations, and production bug fixes.
- Work across multiple cross-functional teams, acting as the primary frontend point of contact for Flights-related changes and releases.
- Mentor and guide interns, reviewing code, clarifying requirements, and helping them understand application architecture and best practices.
- Develop and maintain UI using Vue 3 integrated via CDN within an enterprise OpenCMS environment, adapting modern component-based patterns to legacy constraints.
- Integrate REST APIs exposed via distributed backend services, ensuring correct data flow, error handling, and UI consistency.
- Collaborate closely with backend teams working on Java-based services (NetBeans), with systems gradually transitioning to Spring Boot.
- Gain working exposure to MySQL data models and service-oriented backend architecture.
- Use GitLab for version control and follow enterprise development and deployment workflows.
- Leverage Generative AI tools (GitHub Copilot, Claude) for faster prototyping, debugging, refactoring, and improved code quality.
- Tech Stack: Vue 3 (CDN), JavaScript, HTML, CSS, OpenCMS, REST APIs, Java (backend collaboration), MySQL, GlassFish/Crux servers, GitLab

Web Developer at Swegon BlueBox Pvt. Ltd with three years of experience., 09/2022 - 10/2025

Swegon BlueBox Pvt. Ltd - Navi Mumbai

- Developed and optimized responsive web applications using Vue.js (Vue 2 & Vue 3) with Vuex / Pinia, managing complex application state across multiple modules.
- Built server-side rendered and static applications using Nuxt.js (Nuxt 2 & Nuxt 3).
- Integrated RESTful APIs using Axios, implementing CRUD operations and optimizing asynchronous data flows for improved performance.
- Worked on legacy system modernization initiatives, including framework migrations and UI refactoring.
- Collaborated with designers and backend teams to deliver features end-to-end, from requirement clarification to deployment.

SKILLS

- Frontend technologies: Vue.js (2 & 3), Nuxt.js (2 & 3)
- JavaScript (ES6+), HTML5, CSS3
- Performance optimization and component architecture
- State management solutions: Pinia, Vuex, Redux Toolkit
- API-driven UI state management and async processes
- Backend systems familiarity: REST APIs and Java services
- MySQL database systems and service-oriented architecture
- Development tools suite: Git, GitLab, JIRA, Bitbucket
- OpenCMS usage and generative AI applications
- CI/CD methodologies with AI tools: Copilot, GPT-5, Grok, Claude
- Expertise in prompt engineering

EDUCATION

B.E : Information Technology , 05/2022
GPA: 8.68 CGPA

Diploma : Information Technology, 05/2019
GPA: 71.82%

SSC, 03/2016
GPA: 76.40%

WEBSITES, PORTFOLIOS, PROFILES

- <https://www.linkedin.com/in/rutik-tarekar-r95/>

PROJECTS

- Designing and developing a live cricket scoreboard and overlay system for local match streaming. Focus on animated UI, real-time updates, sponsor modules, and modular, reusable frontend components. Exploring AI-assisted content generation for commentary, captions, and match summaries.
- Helmet and Number Plate Detection Using Machine Learning: It can figure out Whether a biker has worn a helmet or not and also can extract the number plate from a rule violating biker.
